+ Profile

As a software engineer with a robust background in both front-end development and cloud infrastructure, I excel in dynamic environments that require a blend of technical and problem-solving skills. With expertise in HTML, CSS, JavaScript, Node.js, React.js, TypeScript, GitHub, and AWS, I bring a solid comprehension of full-stack development and cloud engineering. My journey began with a coding bootcamp, and through my experience at a startup, I developed a passion for IT, particularly in AWS cloud services, system administration, and network support. Now, I'm pursuing my B.S. in Informatics at University at Albany, along with additional IT certifications. Currently, I'm looking for a part-time role that I can be passionate about during my studies.

+ Education

📅 01/2020 – 06/2021 📍 DENVER, US
Software Engineering | Certificate of Education
