Profile

As a software engineer with a robust background in both front-end development and cloud infrastructure, I excel in dynamic environments that require a blend of technical and problem-solving skills. With expertise in HTML, CSS, JavaScript, Node.js, React.js, TypeScript, GitHub, and AWS, I bring a well-rounded understanding of full-stack development and cloud engineering. My journey began with a coding bootcamp, and through my experience at a startup, I developed a passion for IT, particularly in AWS cloud services, system administration, and network support. Now, I'm pursuing my BS in Information Technology at Grand Canyon University, along with additional IT certifications on top of my current ones. During this time, I'm looking for a part-time role that I can be passionate about during my studies.

Education

01/2020 – 06/2021 DENVER, US
